WHY YOU SHOULD ATTEND

All individuals responsible for installing, constructing, repairing, maintaining or inspecting erosion and sediment control measures or constructing post-construction stormwater management practices at SPDES-permitted construction sites are required to attend a DEC-endorsed 4-hour training course every three years.

Planners, developers and municipalities are encouraged to attend to gain insight on the requirements of the new GP-0-08-001 permit which is required for a wide array of construction activities.

Disturbed area eroding during rainfall event

WHO SHOULD ATTEND

- Contractors
- Developers
- ESC Inspectors
- Planning Board Members
- Municipal Agencies

AGENDA

- 8:30 Registration
- 9:00 Welcome
- 9:05 Stormwater Construction Permit Regulations
- 9:45 Contractor Responsibilities And Construction Permit Requirements
- 10:30 Break
- 10:45 Construction Site Inspections
- 11:30 Erosion and Sediment Control
- 12:45 Winter Site Operations
- 1:15 Closing Remarks

WHAT YOU WILL LEARN

Learn about why stormwater is a concern. Gather information on the new GP-0-08-001 permit and the requirements of stormwater pollution prevention plans (SWPPP). Gain knowledge on erosion and sediment control practice and how to perform site inspections. Discover where you can turn to get technical assistance on erosion and sediment control problems.

INSTRUCTORS

Donald Lake, P.E., CPESC, CPSWQ

Don Lake worked in the USDA NRCS for 27 years and is the principal author of *New York Guidelines for Erosion and Sediment Control*.

WORKSHOP FEES

A registration fee of \$50.00 payable by check is required for all people wishing to attend this workshop. Registration fee includes refreshments during the break.
